CLINICAL APPROACH TO THE MANAGEMENT OF COVID-19 IN PREGNANCY AND THE NEWBORN

Legend: COVID-19 – Corona Virus Disease 2019; PUI – Patient Under Investigation; PUM – Persons Under Monitoring; PPE – Personal Protective Equipment; ACS – Antenatal Corticosteroids; PTL – Preterm Labor; RESU – Regional Epidemiology and Surveillance Unit

* **COVID-19 Delivery Team** – Obstetrician (1-2); Pediatrician (1-2); Anesthesiologist (1); Nurse (1-2)

** **Appropriate Personal Protective Equipment** – 1. Well-fitting N95 mask (fit-tested); 2. Eye protection (goggles or face shield);

3. Impermeable gown; 4. Surgical gloves; 5. Shoe cover. The reader is referred to the Guidelines on Infection Control for COVID-19.

*** **Antenatal Surveillance** – Growth monitoring, AFI with UmA doppler; Detailed anatomic scan at 18-24 weeks for infection acquired during 1st and early 2nd

DISCLAIMER: This guideline was formulated through a collaborative effort from the above professional societies mainly to guide clinicians who will be handling COVID-19 in this special population. The recommendations were made after careful review of currently available limited published data with the consensus of a panel of experts. We will be updating this guideline accordingly as more information becomes available as this disease is still evolving. This can be adopted and modified based on your institution's capacity and standing policies.
